

So what just is The Master's Academy of Fine Arts anyway?

The Master's Academy of Fine Arts is an historically based fine arts program for homeschooled students meeting one day each week for a minimum three hours for a minimum of twenty-five weeks. Each year a Master's Academy location studies the arts based on one of the six rotating historical time periods: Ancient, Medieval/Renaissance, Baroque, Classical, Romantic and Modern. During each class day the students take a history course where we combine arts history in it's world history context, as well as courses in art, drama and music. Students will also choose an elective class for more in-depth study of an area of interest to them.
